PRINCE2 Overview

This course provides an ideal starting point for organizations wanting to find out what benefits PRINCE2 could bring them and how to achieve them. It is also a vehicle for senior staff involved in the introduction of PRINCE2 and needing to get a quick grasp of the principles involved. The course fully presents the PRINCE2 processes and discusses their application in the IT world.

The course is presented by a PRINCE2-certified trainer.

Course Objectives

- Explain the issues of Project Management and position PRINCE2 in the market.
- Show how PRINCE2 is structured and used.
- Present the eight PRINCE2 processes
- Explain the eight PRINCE2 Components
- Review the three basic PRINCE2 Techniques
- Show how PRINCE2's Product-based planning eases the task of Project Management
- Describe the PRINCE2 approach to Quality
- Explain the Management and Specialist products.
- Discuss the principles of tailoring PRINCE2 to your environment.

Audience

- Project Managers needing a quick overview of PRINCE2
- Senior staff needing to understand how PRINCE2 will affect their organization
- Project members being introduced to Project Management techniques

Prerequisites

- Knowledge of basic Project Management

Timetable
